

BUG CHECKING CHART

No Checking Required

Artichoke Bottoms

Asparagus, White

Beets

Butternut Squash

Eggplant

Kohlrabi Bulbs

Horseradish

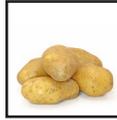

Onions

Parsnips

Peppers

Potatoes

Pumpkins

Radishes

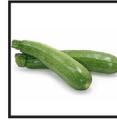

Rutabagas

Tomatoes

Turnips

Zucchini

No Checking Required; Store Properly

These items should be purchased from companies that employ proper quality control and storage practices. Make sure they are properly sealed and stored in a cool, dry area. Improper storage can lead to infestation issues. No additional checking is required.

Nuts

Raisins

Rinse Well

1. Wash the produce under a direct stream of water.*
 2. No further checking is necessary.
- * For Celery Stalks: Wash while rubbing with your hand or a vegetable brush.

Celery Stalks

Endive, Belgian

Grapes

Mushrooms, Button

Mushrooms, Portobello

Visual Check & Thrip Cloth

Remove triangular side leaves and use the thrip cloth method on the tops.
NOTE: Many people find peeling asparagus completely like a carrot yields a tasty kosher result, with no further checking required.

Asparagus

Thrip Cloth Method

1. Wash produce well. (**Note:** Use warm water for broccoli and cauliflower.)
2. Prepare a basin with water and a non-bleach, non-toxic dishwashing detergent solution. The water should feel slippery.
3. Agitate the produce in the solution for 15 seconds. (**Note:** For broccoli and cauliflower, soak for 30 seconds BEFORE agitating very vigorously in the water.)
4. Remove the produce from the basin and shake off excess water over the basin.
5. Pour water through the thrip cloth.
6. Check the thrip cloth over a lightbox for any insects.
7. If insects are found, repeat steps 1-6. This can be done up to three times.
8. If insects are still found on the third try, the produce should not be used.

Parsley

Rosemary

Sage

Spinach

Watercress

Peel Properly

Pineapples

Mites are being found in the crown and outer rind, as well as inside the blossom cups and crevices, if the pineapple is not peeled properly. The pineapple should be peeled until only yellow fruit is visible. The fruit and cutting board should be rinsed after peeling since the insects often crawl onto the cutting board. The crown and rind should not be used on decorative platters since the insects can migrate to other fruit.

Visual Check

Look for holes, webbing or insects inside the fruit. See our website for pictures and more detailed instructions. For Leeks and Scallions: Check inside tube and between leaves, as well as outside the tube for leaf-miner trails.

Carob

Dates

Fennel
Bulbs

Figs

Leeks

Scallions

Remove Peel & Rinse

Mites can be found between the layers of the peel.

Garlic

Quinoa

Note: Quinoa requires KFP certification due to concerns of being processed on *chometz* equipment.

1. Place quinoa in a strainer that won't allow the quinoa to fall through (approx. 15-25 mesh)
2. Shake over white paper or lightbox for approx. 30 seconds.
3. Inspect paper for insects (specifically booklice).

Soap Wash Only

Blueberries

Strawberries

1. Prepare a basin of detergent solution, using at least two tablespoons of detergent per gallon of water.
2. Agitate the strawberries in the solution for 10-15 seconds.
3. Let the strawberries soak for at least one minute in the solution.
4. Rinse off each berry.
5. Repeat steps 1-4 a second time.
6. Cut off the tops with a little of the flesh of the strawberry.
7. No further checking is required.

It is also advisable to inspect samples for presence of scale insects that may be embedded on the outer layer of the berry. We do not recommend using organic, pick-your-own or wild grown blueberries.

Not Recommended

Checking is not practical.

Artichokes

Blackberries

Brussel
Sprouts

Edible
Flowers

Goji Berries

Raspberries
